Experience

01/2019 – present

Node.js back-end developer

At a young IT company in Prague, we created and successfully released a complete new web portal for a major energy company and their customers. As a back-end developer, these are some of the technologies I was using on this project: TypeScript, GraphQL for the API and front/back-end communication, MongoDB, GIT, basic use of Kubernetes in Azure, Kibana.

10/2017 – 12/2018

CDK - ERP Product support analyst - Same as bellow

11/2014 – 04/2017

Infor global solutions – Baan/LN ERP Product support analyst

As a product support analyst at a major global company in the finance department team, I analyzed the technical issues of customers through internal reproductions and trace file analysis of DLL functions.
