Experience

01/2019 – 01/2023 **Node.js back-end developer at ApiTree**
At ApiTree, we created and successfully released a complete new web portal for the energy company Eon and their customers. As a back-end developer, these are some of the technologies I am using on this project:
TypeScript, GraphQL for the API and front/back-end communication, MongoDB, Redis, Git, Kubernetes in Azure, Kibana and Elastic search.

10/2017 – 12/2018 **CDK - ERP Product support analyst**

11/2014 – 04/2017 **Infor global solutions – Baan/LN ERP Product support analyst**
As a Product Support Analyst at a major global company in the finance department team, I analyzed the technical issues of customers through internal reproductions and trace file analysis of DLL functions.

Education

9/2012 – 2/2016 **Business administration**
Czech University of Life Sciences Prague. Faculty of economics
Finished with the title Ing. (master's)

9/2009 – 6/2012 **Business and culture**
Czech University of Life Sciences Prague. Faculty of economics
Finished with the title Bc.

3/2014 – 8/2014 **Exchange student program in South Korea**
Chonnam national university in Gwangju
Lectures held in English
