Experience

01/2019 – present

Node.js back-end developer

At a Prague IT company, we created and successfully released a complete new web portal for the energy company Eon and their customers. As a back-end developer, these are some of the technologies I am using on this project: TypeScript, GraphQL for the API and front/back-end communication, MongoDB, Redis, GIT, basic use of Kubernetes in Azure, Kibana and Elastic search.

10/2017 – 12/2018

CDK - ERP Product support analyst

11/2014 – 04/2017

Infor global solutions – Baan/LN ERP Product support analyst

As a Product Support Analyst at a major global company in the finance department team, I analyzed the technical issues of customers through internal reproductions and trace file analysis of DLL functions.

Education
