| Website | radim.xyz |

## Experience

**01/2019 – 01/2023**

**Node.js backend developer at ApiTree (Prague)**

At ApiTree, we created and successfully released a complete new web portal for a major energy company and their customers. I was mostly responsible for the implementation and maintenance of new APIs (rest and graphql), project-wide validations and tests based on customer requests, and data-flow between our BE and the customer's services.

Core technologies of this project: *TypeScript, GraphQL* (for the FE-BE communication), *MongoDB* (mongoose, hosting and monitoring via Atlas)*, Redis, Git, CircleCI, Docker, Kubernetes in Azure, Helm, Kibana* (for log analysis).

**11/2014 – 12/2018**

**ERP Product support analyst at Infor and CDK (Prague)**

As a product support analyst at a major global company in the finance department team, I analyzed the technical issues of customers through internal reproductions and trace file analysis. English and German teams.

## Education

**9/2012 – 2/2016**

**Business administration**

Czech University of Life Sciences Prague - faculty of economics

Finished with the title Ing. (master's)

**9/2009 – 6/2012**
