## Experience

**01/2019 – 01/2023** — **Node.js back-end developer at ApiTree**
At ApiTree, we created and successfully released a complete new web portal for the energy company Eon and their customers. As a back-end developer, these are some of the technologies I was using on this project:
*TypeScript, GraphQL for the API and front/back-end communication, MongoDB, Redis, Git, Kubernetes in Azure, Kibana and Elastic search.*

**11/2014 – 12/2018** — **ERP Product support analyst at Infor and CDK**
As a product support analyst at a major global company in the finance department team, I analyzed the technical issues of customers through internal reproductions and trace file analysis.

## Education

**9/2012 – 2/2016** — **Business administration**
Czech University of Life Sciences Prague. Faculty of economics
Finished with the title Ing. (master's)

**9/2009 – 6/2012** — **Business and culture**
Czech University of Life Sciences Prague. Faculty of economics
Finished with the title Bc.

**3/2014 – 8/2014** — **Exchange student program in South Korea**
Chonnam national university in Gwangju
Lectures held in English
